In this course, students deepen their critical thinking skills and develop their ability to persist through challenges as they explore function families: Linear, Absolute Value, Quadratic, Polynomial, Radical, Rational, Exponential, and Logarithmic. Students analyze data algebraically and with technology while developing their knowledge of properties of functions, matrices and systems of equations, and complex numbers.

Students will experience high-quality curriculum designed by the faculty at The University of Texas at Austin. The pedagogy of the course, Inquiry-Based Learning, encourages students to take an active role in the construction of their learning. This learning will be accomplished by abstraction, generalization, problem-solving, and modeling.
FUNCTION FAMILIES
Linear and Absolute Value Functions; Quadratic and Cubic Functions; Polynomial, Rational, and Radical Functions; Exponential and Logarithmic Functions

FUNCTION COMPOSITIONS, TRANSFORMATIONS, AND INVERSES

THE COMPLEX NUMBER SYSTEM

MODELING, DATA ANALYSIS, AND FUNCTION REGRESSION

SEQUENCES, SERIES, AND THE BINOMIAL THEOREM

MATRICES AND SYSTEMS OF EQUATIONS AND INEQUALITIES

TRANSFERABILITY
3 College Credits
UT Course Code: M 301
TCCN: MATH 1314

PRE-REQUISITES
Algebra I
Geometry (recommended)

TECHNOLOGY
Computer, Laptop, Chromebook, or Tablet Access

PEDAGOGY
Inquiry-Based Learning
