

TIA Support for Instructors

OnRamps now provides course-specific assessments and observation tools for districts participating in the Teacher Incentive Allotment (TIA).

Available at no cost exclusively to OnRamps dual enrollment partners, these resources are delivered online through the OnRamps TIA Hub:

- Pre- and post-tests that measure student growth with course-specific administration guidelines
- Observational support resources aligned to T-TESS
- Course-specific observation indicators and examples to support classroom observation and feedback
- Training on how to use the included tools and resources

OnRamps classroom experiences reflect the unique design of each course and are grounded in college-aligned, student-centered instructional practices.

These resources help districts recognize and document evidence of high-quality instruction in OnRamps courses.

Available for Select Courses

Chemistry I

College Algebra

Physics I

Precalculus

TIA resources for additional courses will be added in 2027-2028.

Visit onramps.utexas.edu/tia for the latest information.

A Powerful Combination for Teacher Retention

Research shows that Teacher Incentive Allotment (TIA) and OnRamps strengthen teacher retention.

OnRamps Instructors are **7% more likely** to remain at the same campus.

From 2024-2026, **90%** of TIA-designated teachers **remained in teaching roles** in the same district.

With **83% of Texas districts** projected to participate in TIA for 2026-2027, OnRamps provides dual enrollment partners with resources that support inclusion of OnRamps Instructors in local designation systems.
